The deflexions ought to be in opposite directions. be required in subsequent experiments, (ii) Measure the exact length between the terminals of the bridge of one of the German silver wires, whose resistance, r , was determined in the last experiment. With the screw gauge find the diameter of the uninsulated wire in two or three places, and take the mean as the true diameter. Calculate the sectional area, a (or $17 r^2$), and determine the specific resistance, k , of German silver by substituting for known quantities in kz . -- (See...
