Excerpt: . . . ISRP 2003-9 Final RFS Review Does the proposal employ the use of microsatellite DNA analysis in order to ascertain the pedigree of resulting progeny and subsequent returning adult steelhead. If not does the method proposed provide quantification of reproductive success of equal of better power than microsatellite DNA analysis Yes. Does the study include analysis of the potential genetic consequences of repeat-spawning steelhead on small populations No. Not specifically addressed. Other research topics, which should be addressed in the proposed study if possible, include: How increasing iteroparity might increase inbreeding in the target population, particularly if it is small Not specifically addressed. How reconditioning kelts might increase domestication selection in the target population And Not specifically addressed. How the reconditioning program might alter age structure and life history structure in the target population. Not specifically addressed. Does the research site (s) offer the ability to capture and sample sufficient outmigrating offspring and all, or nearly all, returning adult steelhead. This is a criterion for site selection. Is the proposed study directly applicable to one or more of the following listed ESUs: Upper Columbia, Mid-Columbia, and Snake River steelhead. Yes, in all three. Cost-effectiveness (e. g. , the ability to take advantage of existing fish production, research, monitoring or evaluation activities) will be an important consideration in the proposal selection process. No, at 1, 017K for year one, this is one of the more expensive proposals. However, the study allows for replication in 5 streams, or about 200K per...
